Communication - Human Resources - IT

Challenges HumanResources

ChallengesInternal communication

## Why a new system?

#### **ACTUAL** situation

- Employee master in BMD (CRM, ZEIT, LOHN) (only for AT), no employee master of subsidiaries
- Manual creation of employees in SAP HR1 and other systems (SAP, Who is Who, elVIS, e-shop...) by different departments/persons.
- Many manual and paper-based HR processes that require a lot of effort.
- No communication medium to reach all employees.

#### NEW requirements

- ✓ E-Recruiting
- ✓ Automation HR processes
- ✓ New projects/tools that require a central employee master (MA App, access system, ...)
- √ Faster and better communication
- ✓ Modern intranet / knowledge base
- ✓ E-Learning

What do the employees say?

Newsfeed is great, you are constantly informed about news.

You get faster and more info from other sites and departments.

Through the channels I am always TOP informed about the individual departments!

All info is in one place and with the search function everything can be found quickly!

Apprentices in vocational school and employees on maternity leave are always up to date!

All contact details and organizational charts of the teams at a glance.

Sick leave, doctor's notes, etc. are much less complicated to submit!

With the app, I have access to important information anytime, anywhere.

With the chat function, I can quickly exchange information with my colleagues.

As a manager, I always have an overview of all application documents!
